Subject: RE: Approval for Public Requested. FW: Three Maps

Adam Adams says he sends all stakeholders (Unified Command participants) the links and informs them they can put the links on their public web pages. As soon as maps are public, I can work with my counterpart at TCEQ and ask to place links on their web page. <https://www.tceq.texas.gov/response/itc-terminal-fire-update>

How does this sound? And Ronnie has said he wants maps public, but to keep the tables for backup material (not public). Carmen
